

ExSTOL

danielson
Aircraft Systems

New UAV able to stay in the air more than 50 hours and to take off and land on short distance and unprepared surface.

ExSTOL : *Extrem Short Take Off and Landing*

MAIN CHARACTERISTICS ARE :

- Landing in 90 m (DF15)
 - Takeoff in 98 m (DF15)
 - 200 hp (2 Trident engines of 100 hp each)
 - Empty weight 650 kg
 - Payload 400 kg (Payload + Fuel)
 - Max load 1050 kg (MTOW)
 - Wingspan 8m
 - Minimum speed: 36km/h
 - Maximum speed: 280 km/h
 - Endurance:
 - 52 h (with 50kg payload)
 - 20 h (with 250 kg payload)
 - Scale model flying with a wingspan of 3.2 m
- make life easier, more efficient, and more productive.

We are now looking for partners to move forward to the next step of this project.

ExSTOL UAV CONCEPT HAS BEEN PROVEN THANKS TO :

- CAD analysis;
- CFD and 2400 simulations;
- Wind tunnel test (total 8 weeks);
- 20 flights at reduced scale;
- Two patents have been filled.
